

# Tris work unit

## 9044 COUPLED TRIS CYLINDERS

For demanding tasks or mass production, this special workbench is available. It uses two cylinders to avoid unnecessary changes of tooling, thus enabling punching, bending and cutting to be carried out with a considerable reduction in time and labour costs. Cylinders have the same characteristics of the Tris 9042.

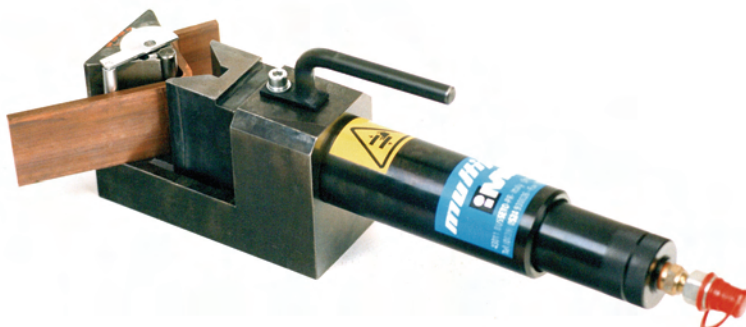

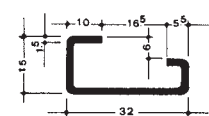

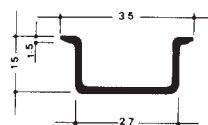

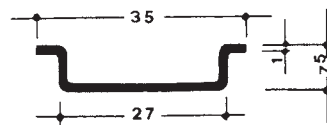

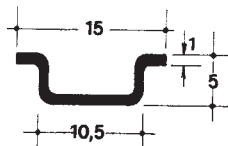

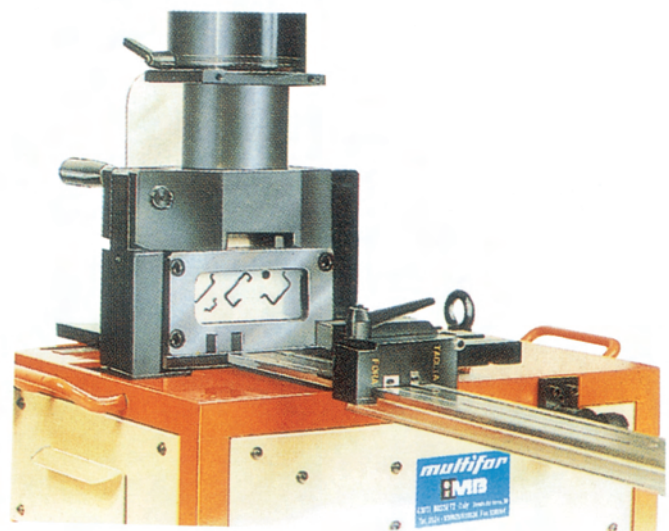

**Size:** cm. 94x60x72 h.  
**Weight:** 122 Kg.  
 Supplied with 1 mt ruler

## Din Rail Cutter 9055 for cutting and punching Din and special metal profiles

A useful and complete tool which ensures a rapid and precise cutting of rails without burrs and deformations. This tool can also make oval holes, longitudinally and transversally in the profile.

The punching can be done in two positions: one with fixed wheel-base and the other on a passer-by guide with the measurement of the rule. It is possible, on request, to assemble punches for round and special punches.

## PORTABLE BAR BENDER 9047

**Power:** 50 KN  
**Dimensions:** 78x350x170h  
**Gross Weight:** Kg. 16  
**Stroke:** 50 mm.  
**Characteristics:** Copper bars max. 80x8 or 60x10  
 Equipped with n. 2 tools and protractor.
