## **GENERAL SAFETY REGULATIONS**

### **Read all safety regulations and instructions!**

1. Keep the place of work clean.  
Disorderly work-places and work-benches invite accidents.  
Ensure that lighting is good.
2. Keep children away.  
Do not allow unauthorised persons to touch the device or the cable.  
Keep unauthorised persons away from your place of work.
3. Wear suitable working clothing.  
Do not wear any wide clothes nor jewellery - they may get caught up in moving parts.  
When working in the open it is recommended that you wear rubber gloves and non-slip footwear. Wear a hair- net if you have long hair.
4. Always be alert.  
Only use a device after having been instructed in its operation.  
Concentrate on your work. Proceed sensibly.  
Do not use the device when you are distracted.
5. Do not lean too far forward. Avoid abnormal stance.  
Make sure that you have a secure standing position, and maintain balance at all times.
6. Leave safety devices where they belong.
7. Hand tools may not be installed as fixtures.
8. Repair and maintenance.  
Have repairs and maintenance work carried out in an authorised NOVOPRESS specialist workshop.  
Only use original and identical NOVOPRESS spare parts.  
We reject all responsibility and liability for work carried out by third- party personnel.

## SAFETY INSTRUCTIONS FOR HYDRAULIC EQUIPMENT

1. Please read the operating instructions.  
Acquaint yourself with the hydraulic equipment.
2. Provide the equipment with the necessary care.  
Always keep the equipment in operational condition.  
Cleanness is an essential requirement for good and safe working.
3. Switch off the electric power supply to the hydraulic equipment,
  - when the equipment is not in use
  - when maintenance work is to be carried out.
4. Avoid unintentional switching - on.  
Keep hands and feet away from the switch when the equipment is not being used.
5. Do not use the equipment in a manner in contravention of the instructions.  
Never carry the equipment by the pipe or pull on the pipe.  
Protect the piping from heat, oil, sharp edges and high levels of weight strain.
6. Use only piping, fittings and accessories which have been designed for the operating pressure of the hydraulic unit.  
**BURSTING PRESSURE OR TEST PRESSURE IS NOT OPERATING PRESSURE!**  
Avoid squashing or bending of the piping.  
Piping must not be painted over.
7. Replace the hydraulic piping
  - when cracks, squashed or bent points are to be seen
  - when blistering is established
  - when hydraulic fluid escapes
  - when pipe fittings are damaged
  - when discolouration is established on the outer layer, e.g. due to the influence of solvents.
8. The hydraulic fluid used in the system is kerosene-based.  
This requires particular care and attention.
  - Avoid continuous contact with the skin
  - ensure that the hydraulic fluid does not get into the eyes or mouth.Hydraulic pipes have to be replaced after 5 years of usage, despite of the circumstance that no damages should be remarkable.
9. The equipment must not be operated, if it has leaks and there is a danger of hydraulic fluid coming into contact with persons, open fire, heating equipment, electric cabling, ground water, foods and other substances which are intended for human consumption.
10. Hydraulic units with petrol engines
  - must not be operated in closed rooms, due to the **DANGER OF INTOXICATION!**
  - do not pour in petrol while the motor is running or in the vicinity of open fire. **DANGER OF EXPLOSION!**

**WARNING!      BEFORE CARRYING OUT MAINTENANCE  
WORK AND BEFORE CHANGING THE TOOLS  
DECOUPLE THE HYDRAULIC UNIT OR  
DISCONNECT THE HYDRAULIC UNIT  
FROM THE MAINS.**

## HSBL-Cylinder 2420

### Dismantling/assembly

1. Unscrew the coupling plug (15) and pour the oil into a clean vessel (approx. 0.6l).

After the repairs have been carried out fill the oil back into the cylinder.

2. Remove the holding bolt (8), handle (7) and stand (5) from the HSBL- Cylinder.
3. Clamp the receiving plate (A), Order No. 7751, into a fixed vice.
4. Place the HSBL-Cylinder into the receiving plate (A). The cylinder piston rests on the vice.
5. Place the clamping tool (B), Order No. 7752, on to the cylinder and place the disc (C), Order No. 7753, on it. Secure all parts with an R 3/8" x 33 mm bolt (D).

6. Unscrew the cylinder pot with the clamping tool (B). Turn anti-clockwise. By using tubes on the clamping tool's arms (B) they can be extended to any length. The cylinder pot jumps a little at the end of the screwing process. (tension spring relief)

7. Change damaged or worn parts.

8. Replace the cylinder pot, press it down and turn it until the thread grips. Tighten the cylinder pot.

### **Warning!**

No dirt should be allowed to get into the cylinder when reassembling.

## 2420 Hydraulic Cylinder HSBL

No.	Item	Order No.	Quantity
1	Complete cylinder head	6923	1
2	Cylinder	2394	1
3	Piston	2395	1
5	Stand	5418	1
6	Distance piece	1088	1
7	Handle	1176	1
8	Bolt	1094	2
9	Bolt guide	1093	2
10	Clamp	1096	2
11	Pressure spring	2399	1
12	Angle	5419	1
13	Grooved ring 115x95x15	11164	1
14	Scraper AS 60x70x7/10	11237	1
15	Coupling plug R3/8" (device plug)	3718	1
16	Notched nail 2x6	11120	2
17	Cylinder screw M 5x20	11010	4
18	Spring washer A 5	11038	4
19	Snap ring	11234	1
20	Cylinder screw M 8x45	11233	4
21	Spring washer A 8	11235	4
22	Hexagonal nut M 8	11367	5
23	Cylinder screw M 6x25	11082	1
24	Type plate	11236	1
25	Cylinder screw M 8x20	11094	1
26	Washer $\varnothing$ 8,4	11230	1
27	Dust cap for plug end	1514	1
28	Cylinder screw M 6x20	11009	1
29	Washer 6,4	11273	2
30	Spring washer	11652	2
31	Washer $\varnothing$ 6,4	11203	1
32	Rolling support	36012	1

## 1179 HSBL Bending Tool with Angle Indicator

No.	Item	Order No.	Quantity
1	Bottom part of bending tool	1166	1
2	Top part of bending tool	1165	1
3	Complete angle-measuring system	6958	1
6	Knurled screw	31457	2
7	Spindle pin	11426	1
8	Hexagonal nut	11429	3
9	Threaded pin	11427	1
10	Washer	11251	1

## Aligning the bottom die

- A) At right angles to the angle indicator.
- Set the U-shaped bottom die (1) at right angles to the angle indicator by using a square (A).
- Screw the set screws (7) and (9) towards the cylinder bars so that they slide along the cylinder bars without play for the whole stroke. Check by moving the piston forwards and backwards.
- Counter the set screws (7) and (9) with the nut (8).
- Tighten the screws (6).

- B) By closing the tools with an inserted conductor rail 120 x 10.

1. Loosen the nuts (8) on the set screws (7) and (9) by approx. 3 turns.
2. Unscrew the set screws (7) and (9) so that they clear the cylinder bars by at least 2 mm.
3. Place a piece of conductor rail (B), e.g. 120 x 10-200 in the bending iron.
4. Bend until the safety valve in the basic unit switches off. Keep the foot switch pressed and tighten the bolts (6). Now switch off and allow the piston to return.
5. Tighten the set screws (7) and (9) so that they slide along the cylinder bars for the whole stroke length without any play. Move the piston forwards and backwards for this. Then counter the set screws (7) and (9) with the nuts (8).

## 1627 HAV-2 Hydraulic Stop for the Bending Tool

No.	Item	Order No.	Quantity
1	Valve body	1628	1
2	Guide piece	1629	1
3	Hollow screw	1630	1
4	Valve cone	1631	1
5	Bush	1633	1
6	Switch lever	1634	1
7	Attaching angle	1636	1
8	Shifter rail	1637	1
9	Spring guide screw	2103	1
10	Grooved ring	11420	1
11	Pressure spring	11263	1
12	Usit-ring	11013	1
13	Usit-ring	11423	1
14	Sphere	11051	1
15	Cylinder pin	11436	1
16	Cylinder screw	11094	2
17	Cup ring	11300	9
18	Washer	11273	1
19	Hexagonal nut	11383	1
21	Headed drill bush	11434	1
22	Star grip	11433	1
23	Hexagon nut with collar	11432	1
24	Control cam	1635	1
25	Clamping lever	11191	1
27	Stop tube	4171	1
28	Usit-ring	11333	1

### Mounting the 1627 Hydraulic Stop.

- 1 Unscrew the coupling plug (15/2420) from the HSBL-Cylinder (see page 2). For this the cylinder must be standing upright with the coupling plug (15/2420) pointing upwards.
- 2 Fasten the valve body (1) to the cylinder with the hollow screw (3).
- 3 Screw the coupling plug (15/2420) into the valve body (1).
- 4 Unscrew a nut (8/1179) from the set screw (9/1179) on the bottom part of the iron. Place the attaching angle (7) on to the set screw (9/1179) and fasten with the nut just removed.
- 5 Loosen the hollow screw (3) a little. Adjust the valve body (1) so that the holes for the shifter rail (8) and those in the valve body (1) are aligned; tighten the hollow screw (3).

### Setting the forward stroke limit

- 1 Place the conductor rail straight on the angle indicator and hold.
- 2 Screw the adjusting nut (23) towards the switching off valve so that it is approx. 20 mm from it, activate the foot switch and hold until the HAV-2 switches off.
- 3 Turn the adjusting nut (23) back a little and activate the foot switch again and hold until the HAV-2 switches off. Then measure the angle that has just been bent. Repeat this procedure until the required angle has been reached. Then counter the adjusting nut (23) with the star grip (22).

### Setting the back stroke limit.

The back stroke is set by sliding and clamping the control cam (24). The back stroke should be limited in such a manner that the bent conductor rail can be easily removed.

**1081 Cable cutters**

No.	Item	Order No.	Quantity
1	Knife	1097	1
2	Pressure plate	1098	1
3	Hexagonal screw	11393	1

## 2350 HSBL 120 Cutting Tool (up to unit number 1392)

No.	Item	Order No.	Quantity
1	Stand	5408	1
4	Cutting strip	1985	2
5	Stand	1201	2
6	Knife / serie / to 10 mm	1982	1
7	Base plate	2335	1
10	Cylinder screw M 6x10	13512	6
11	Set screw M8 x16	12450	1
12	Clamping sleeve 6x32	11394	1
13	Hexagonal screw BM 10x20	11393	1
14	Cutting edge guide	2259	4
15	Cylinder screw M 8x40	11280	2
16	Hexagonal nut M 8	11367	2
17	Spring washer A 8	11235	2
18	Spring washer A 6	11652	4
19	Cylinder screw M 6x10	11270	4
501	Protection devices (Conversion kit)	31394	1
601	Knife / special / on inquiry	7197	1

### Changing the knife

1. Pull the base plate (7) with knife (6) out of the frame.
2. Knock out the clamping sleeve (12) with a drift with a diameter of 5 mm.
3. Change the knife (6).

### Changing the cutting strips

1. Remove the cutting edge guides (14).
2. Unscrew the bolts (10) and change the cutting strips.

**2350 HSBL 120 Cutting Tool** (unit number 1393 up to unit number 1460)

No.	Item	Order No.	Quantity
1	Stand	5408	1
4	Cutting strip	1985	2
5	Stand	1201	2
6	Knife / serie / to 10 mm	1982	1
7	Base plate	2335	1
8	Protection devices (Conversion kit)	30108	1
10	Cylinder screw M 6x10	13512	6
11	Set screw M8 x16	12450	1
12	Clamping sleeve 6x32	11394	1
13	Threaded pin M 10x12	13535	1
14	Cutting edge guide	2259	4
15	Cylinder screw M 8x40	11280	2
16	Hexagonal nut M 8	11367	2
17	Spring washer A 8	11235	2
18	Spring washer	11652	4
19	Cylinder screw M 6x10	11270	4
601	Knife / special / on inquiry	7197	1

**Changing the knife**

1. Pull the knife (6) together with the base plate (7) and the protection device (8) out of the stand (1)
2. Unscrew the screws (8.9) from the protective device (8) and remove items (8.2) and (8.3).
3. Pull the base plate (7) together with the knife (6) out of the protection device (8).
4. Knock out clamping sleeve (12) with a mandrel with a diameter of 5 mm.
5. Change the knife (6).
6. Assemble the base plate (7) and the new knife (6).
7. Slip the protective device (8) over the base plate (7) until it is in contact with the cutter blade (6).
8. Use the screws (8.9) to attach items (8.2) and (8.3) to the protective device (8).

**Changing the cutting strips**

See page 9

**2350 HSBL 120 Cutting Tool** (from unit number 1461)

No.	Item	Order No.	Quantity
1	Stand	5408	1
4	Cutting strip	1985	2
5	Stand	1201	2
6	Knife / serie / to 10 mm	1982	1
7	Base plate	2335	1
8	Protection devices (Conversion kit)	31393	1
10	Cylinder screw M 6x10	13512	6
11	Set screw M8 x16	12450	1
12	Clamping sleeve 6x32	11394	1
14	Cutting edge guide	2259	4
15	Cylinder screw M 8x40	11280	2
16	Hexagonal nut M 8	11367	2
17	Spring washer A 8	11235	2
18	Spring washer	11652	4
19	Cylinder screw M 6x10	11270	4
601	Knife / special / on inquiry	7197	1

**Changing the knife**

- Pull the knife (6) together with the base plate (7) and the protection device (8) out of the stand (1).
- Unscrew knurled screws (15/drawing 31393).
- Unscrew the screws (8.11) from the protective device (8) and remove items (8.6) and (8.14).
- Pull the base plate (7) together with the knife (6) out of the protection device (8).
- Knock out clamping sleeve (12) with a mandrel with a diameter of 5 mm.
- Change the knife (6).
- Assemble the base plate (7) and the new knife (6).
- Slip the protective device (8) over the base plate (7) until it is in contact with the cutter blade (6).
- Use the screws (8.11) to attach items (8.6) and (8.14) to the protective device (8).
- Screw in knurled screws (15/drawing 31393).

**Changing the cutting strips**

16	Rubber plate	7268	1
18	Hexagonal nut M8	11367	3
19	Cylinder screw M 8x40	11280	2
20	Spring washer	11235	2
21	Cylinder screw M 8x45	11233	4
22	Set screw M 8x16	12450	1
23	Cylinder screw M 6x10	11339	10
24	Cylinder screw M 8x25	11252	1
25	Cylinder screw M 6x16	11095	10
26	Cylinder screw M 6x10	11270	4
27	Spring washer	11652	4
28	Rubber guard	12639	2
29	Cutting edge holder	8783	1
30	Disk handwheel	12440	1
31	Clamping sleeve	11107	1
32	Threaded bolt	8837	1
33	Threaded pin M8x16	11180	2

### Changing the cutting edges/changing the cutting strips

1. Unscrew the four bolts (21).
2. Remove (5) and (6) and the complete protective device.
3. Pull the cutting edge holders with the cutting edges up and tip out of the frame.
4. Unscrew bolt (24) and change the cutting edge.
5. Remove the cutting edge guides (8).
6. Unscrew bolts (23) and change the cutting strips (3).

### Changing the protective window

1. Unscrew the (21) bolts.
2. Remove (5) and (6) and the complete protective device.
3. Remove the protective cover (14) from the protective device.
4. Loosen the (25) bolts on one side.
5. Change the protective window.

## 7030 Vice for the 160 Cutting Tool

No.	Item	Order No.	Quantity
1	Support guide	6981	1
